#### WAR FORMAT

Any departures from usual A.L.A. style and standards of format in this book are the result of the war. Conservation of materials and labor through the use of lighter weight paper and smaller type contributes to the thinness of this book. Shifting personnel attributable to wartime conditions may also have resulted in inconsistencies of style and even in some typographical errors.

## *Introduction*

WHEN THE SUBJECT INDEX TO BOOKS FOR INTERMEDIATE GRADES APPEARED in 1940, the compiler was already at work on a supplement. Of the many books written in the past three years to meet new curricular needs, about 600 are here analyzed. This supplement, obviously, is not complete in itself as, with few exceptions, it indexes only new material issued from 1940 to 1943. The larger, original volume is still basic.

New trends in curricula are particularly noticeable in such fields as Latin America, American Life, Aviation and Radio. The examination of courses of study previously had shown Latin American units. However, little good and up-to-date material in this field was available for grades 4-6 at the end of 1939, at which time publishers were just becoming aware of this need.

A number of stories portraying American life for the intermediate grades are indexed under names of states, subhead Stories, the date, when known, being put in parentheses following the title. It is hoped this will aid in studying various phases of American life at different periods through fiction as well as texts. Where the American Guide Series and the Writers' Program Guides to the States are available, the teacher will find them excellent reference material in studying American life.

In contrast to the great amount of new material on the western hemisphere, new material on European countries has been understandably lacking. Many of these countries are still studied in the intermediate grades and the books indexed in SUBJECT INDEX TO BOOKS FOR INTERMEDIATE GRADES, 1940, are the best covering the European background up to the beginning of the war. Most material picturing the war situation and political conditions in Europe today is written for and studied by pupils of junior high or senior high school age. Teachers will find the Headline Books published by the Foreign Policy Association at 25c each (paper) excellent help in discussing with the intermediate grades current topics on Europe, Latin America and other parts of the world.

This supplement is to be used in the same manner as the original book. Titles with an asterisk (\*) or double asterisk (\*\*) are indicated for first purchase, the double asterisk indicating a book unusually good as to curriculum tie-up, content, style and format.

## INTRODUCTION

---

Grading is shown by a three-grade span (occasionally a two-grade or four-grade span is used) or a symbol, or a combination of the two. Symbols used are: used are:

P —Picture material important

I —Good for identification

H —Handicraft

T —Mainly for teacher use

Combinations of the above symbols

v.p.—(various pages) to indicate that subject matter is treated in many places in the book

An innovation has been made in including Dewey Decimal class numbers in the List of Books Indexed. As far as possible these conform to those used in the H. W. Wilson Co. *Children's Catalog*. This inclusion was requested as a convenience for librarians and teacher-librarians.

A short list of notes on new editions is included.

No attempt has been made to index poetry or play collections and the compiler suggests that all libraries should, if possible, own:

BREWTON. Index to Children's Poetry. H. W. Wilson. 1942.

A.L.A. BOARD ON LIBRARY SERVICE TO CHILDREN AND YOUNG PEOPLE.  
Subject Index to Children's Plays. A.L.A. 1940.

The compiler wishes to thank the following consultants for suggestions of new units and the selection of books:

Elizabeth D. Briggs, Director of Work with Children, Public Library, Cleveland, Ohio.

Dorotha Dawson, Supervising Instructor, School Libraries, Detroit, Michigan.

Margaret R. Greer, Director of School Libraries, Board of Education, Minneapolis, Minn.

Virginia McJenkin, Supervisor, Fulton County School Libraries, Atlanta, Ga.

Jean Meikle, Director of Intermediate Grades, Board of Education, Yonkers, N. Y.

Mrs. Florence Tredick, Library Adviser, Department of Public Instruction, Schenectady, N. Y.

## INTRODUCTION

---

Elizabeth O. Williams, Assistant Supervising Librarian, Board of Education,  
Los Angeles, Calif.

In addition to the regular consultants, the compiler wishes to thank the following:

Gertrude W. Morse, Head of Children's Department, and several of the school librarians of the Public Library, Evanston, Ill.

Jean Gardiner Smith for suggestions as to Latin American titles.

Helen Voltr Burson of the Chicago Public Library staff for excellent clerical assistance, and several others who assisted in the clerical work.

Mildred Batchelder, Helen Kinsey, Harold English and E. O. Fontaine of the A.L.A. staff.
